If you are exploring battery energy storage solutions for your project or facility, contact our team today to learn how our advanced 10 MW systems can help you achieve greater efficiency, reliability, and ...

Our energy storage solution is flexible in design and can be seamlessly integrated with various existing base station power systems. The modular design can better adapt to different types of base stations, ...

High-capacity graphene energy storage solution designed for grid, partial-grid, and microgrid applications. Built for resilience, it offers ultra-long lifecycle performance with zero thermal risk--ideal ...

The core components of these systems include PCS, lithium-ion batteries and energy management systems. These "turnkey" ESS solutions can be designed to meet the demanding requirements for ...

The project aims to provide clean energy solutions for small commercial and industrial applications through a 20-foot high cabinet housing the power conversion system (PCS), capable of 100 kW ...

We specialize in designing and manufacturing high-performance energy storage systems, offering a wide range of battery cabinets and containerized solutions for commercial, industrial, renewable ...

Utility-scale Battery Energy Storage Systems Scalable from 10MWh+. AmpLINK(TM) BESS is, designed for large-scale and utility-grade applications.

With 82% of utilities planning time-of-use rate adjustments by 2026, scalable storage becomes non-negotiable. Our containerized 10 MWh battery systems allow capacity expansion in 2.5 ...
