SunArk energy storage containers provide a convenient, flexible, and reliable solution for deploying and managing battery storage systems, offering numerous benefits for a wide range of applications.

As a standardized "energy package," each container provides 250kW/430kWh, and up to five units can be paralleled, enabling capacity expansion from 100-1000kW / 200-2000kWh. This containerized ...

Contact us today to learn more about our containerized energy storage systems and receive a comprehensive proposal including detailed energy storage container price information for your project.

Ideal for use in renewable power plants. Powered by lithium-ion batteries, this portable product is ready to supply reliable power in challenging situations. It can work in island mode, as a hybrid solution ...

This product is designed from the perspective of reducing customer site work, and the overall weight of the container is designed below the maximum allowable transport weight, reduce ...

A high-performance, all-in-one, containerized battery energy storage system developed by Sunark, provides C& I users with the intelligent and reliable solution to optimize energy efficiency and resilience.

With a power output of 250KW and 860kWh of lithium battery storage, this system is designed for intensive operations where space, mobility, and reliability are top priorities.

o xStorage BESS holds 250 to 1000 kWh of usable stored energy (279 to 1117 kWh of installed energy). o The BESS includes a control cabinet with auxiliary transformer, a power conversion system (PCS) ...
