More energy-efficient and monitoring management; the temperature-controlled fan automatically adjusts the wind speed, with low power consumption, and supports RS485 serial communication upload.

The 25U Solar Battery Cabinet, equipped with a 40kWh energy storage system, is a highly efficient and reliable electrical enclosure specifically designed for renewable energy applications.

The 40KWh Indoor Photovoltaic Energy Cabinet provides a reliable and sustainable power solution for telecom base stations, reducing dependency on traditional power grids and lowering operational costs.

It can temporarily act as a charging pile for electric vehicles, providing buffer power for electric vehicle charging piles and alleviating the instantaneous pressure on the power grid.

The 40KWh LiFePO4 small energy storage cabinet, single cell 100AH, 1 parallel 128S, 409.6V 100AH, system consists of 8 8S1P modules, 1 high-voltage control box and a double-door battery cabinet.

The EK indoor photovoltaic energy storage cabinet series is an integrated photovoltaic energy storage device designed for communication base stations, smart cities and other scenarios, providing a ...

We are not only a manufactory of EV Charging Stations, but also committed to providing overall operation and charging solutions for electric vehicles, as well as the construction of charging facilities.

Fully compliant with mandatory protection standards for terminal circuits in charging applications, the XL-21 ensures maximum safety and reliability. Tailored for optimal performance, it's the ideal choice for ...
