Renewable energy independent power producer (IPP) Greenvolt is close to bringing a 5MW/5MWh battery energy storage system (BESS) online at its biomass plant in Coimbra, Portugal.

Portuguese energy company, Galp, has partnered with Powin to create a 5 MW/20 MWh solar storage system at one of Galp's solar plants with ground pv mounting in Alcoutim, Portugal.

Installed in the southern Portuguese region of the Algarve, the 5MW/20MWh battery system enhances the site's ability to dispatch renewable energy to the grid when it needs it most and ...

Powin will provide the 5MW/20MWh BESS for one of Galp's operational PV plants, in the village of Alcoutim in the Algarve, south Portugal, the latter's first such solar-plus-storage hybridisation.

Global energy storage supplier Powin LLC and Portuguese integrated energy company Galp have partnered to install a utility-scale battery energy storage system (BESS) in Algarve, ...

Galp has entered into a partnership with North American company Powin to install an energy storage system, using large-scale batteries, in one of its photovoltaic plants, in Alcoutim, in ...

Portugal's energy-storage market is entering a new stage of maturity, combining grid-scale standalone batteries and hybrid (co-located) systems with renewable plants.

The Portuguese Environment Agency's Participa portal currently features two big renewables-plus-battery project proposals.
