-----

Made of polycrystalline silicon, this mini solar panel offers high-quality performance. With a rated voltage of 5.5V, current of 120mA, and power of 0.66W, it provides reliable power output. The panel ...

The mini solar panel is made of polycrystalline silicon ...

This product is a 5v 230mA (1.15W) solar panel with high efficient polycrystalline cells mounted onto the fibreglass PCB and covered with epoxy resin, which protects the cells without reducing efficiency. ...

Discover offers on San Hima 4X 170W PERC Solar Panel Kit Mono Multi-busbar Tech Bypass Diode 5MM at Dick Smith. Browse our extensive collection of Solar Panels & Kits, and enjoy more from ...

In order to meet the individual requirements of various photovoltaic systems, Hemu offers standardized solar cells with an effective area of 10#215;10 mm#178; or 5#215;5 mm#178; as bare solar cells or modules.

Suitable for all kinds of low-power electrical appliances, advertising lights, household lights, electric fans, such as solar water pumps, and small solar systems.

DAH Solar's patented frameless module design eliminates the traditional 5 mm front-side frame, using an innovative 128#176; curved surface angle on each side of the module.

The mini solar panel is made of polycrystalline silicon great for all kinds of low-power electrical appliances, advertising lights, household lights, electric fans, such as solar water pumps, and small ...
