-----

It is understood that the battery technology route of the project is N-type ABC battery technology, with a planned construction period of 18 months and a total investment of about 85. The ...

First Finance Correspondent called the Aixu Co., Ltd. investor hotline this morning. The staff said that there are no technical problems with the construction of N-type TopCon.

After the project reaches full production capacity, it will add a globally leading 10GW N-type ABC high-efficiency solar cell and 10GW module production capacity.

Aixun's ABC technology not only breaks through the bottleneck of battery mass production efficiency, but also greatly improves the power generation performance and scene adaptability of components.

AIKO's ABC modules are built to deliver high power, bigger returns, and guaranteed long-term performance -- even under the most demanding site conditions. ABC modules are designed to ...

At the same time, the ABC precision welder art developed by Aixu this time has completely eliminated the gap between the space and the electric surface area is 0.5%. In addition, ...

Discover the new generation of ABC Gen2 panels from Aiko and all the improvements they include.

This white paper aims to systematically analyze the industrial breakthrough path and application value of BC technology, so that investors in the photovoltaic industry can have a clear understanding of the ...
