---

Founded in 2020, Invinity Energy Systems manufactures vanadium flow batteries for large-scale, high-throughput energy storage requirements of business, industry, and electrical networks.

The Clear Creek Flywheel Energy Storage System is a 5,000kW energy storage project located in Norfolk County, Ontario, Canada. The electro-mechanical energy storage project uses flywheel as its ...

Inaugurated in December 2025, this groundbreaking project features a 25.4 megawatt-peak (MWp) solar PV system paired with a 75.26 megawatt-hour (MWh) battery storage solution, providing round-the ...

Vanadium redox flow batteries (VRFB) are one of the emerging energy storage techniques being developed with the purpose of effectively storing renewable energy.

In Angola, 75.26 MWh of battery storage has begun operating as part of Africa's largest off-grid renewable energy system to date.

As Dr. Nzinga Mbandi, Angola's lead project engineer, quips: "We're not just storing energy - we're storing economic potential." With plans to export surplus power to Namibia and Zambia by 2028, this ...

Recent advancements in energy storage projects highlight the country's commitment to bridging energy gaps and supporting renewable integration. This article explores the latest updates, challenges, and ...

Work is underway to increase the storage capacity to nearly 30 MWh upon final completion in January. The project expansion was made possible through a EUR55 million bridge ...
