Who makes arc-resistant switchgear?

Crown Arc-Resistant Switchgear Crown Technical Systems is one of the few companies in the world that engineers and manufactures arc-resistant switchgear. Our original engineering team pioneered the widespread use of arc-resistant gear throughout Canada.

What is arc resistant switchgear?

Unlike conventional switchgear, arc-resistant switchgear is designed with reinforced compartments that can withstand incredible pressure increases during high-energy arc faults. Arc-resistant switchgear offers a safe, proven, and cost-effective solution to the problem of arc flash events. Why do I need Arc-Resistant Switchgear?

What is an arc flash?

An arc flash is an electrical explosion where energy leaves the circuit that it is contained in and travels through the air. The blast from an arc event combines voltage, heat--up to 35,000 degrees Fahrenheit--and violent concussion. Even with special PPE, those in the vicinity of an arc flash risk injury or even death.

Are low-voltage switchboards vulnerable to arc flashes?

The provision of reliable power in such buildings is reliant upon the low-voltage distribution switchboards that lie at the heart of the electrical installation. Demands placed upon these switchboards, particularly as operations and infrastructures expand over time, leave them vulnerable to arc flashes.

ABB authorized MDrail-E power switchgear to SETN We are very honored to obtain the switchgear certificate authorized by ABB in March 2024, providing high-quality switchgear equipment to ...

R& B Switchgear Group offer a specialist range of arc flash mitigation solutions for low and medium voltage switchgear, designed to prevent and mitigate incidences of arc flash, thereby helping to ...

All Sell-Best arc protection relays can use fiber optic sensors to detect arc flashes or arc faults within milliseconds. Their compatibility with various communication protocols and interfaces enables ...

Discover all relevant Switchgear Manufacturers in Iran, including Switchgear Content and Mandegar Tajhiz Iranian (MTI-ISKRA)

Alfabargh specializes in designing, supplying, manufacturing, and installing all types of low-voltage & medium-voltage panels, and compact substations. We also develop the design of BMS and RTU ...

Infographic There several causes of arc flashes - such as faulty materials, installation problems or operating errors. What are the risks for your business?

Human errors of personnel working on the switchgear, condensation, lack of maintenance or even small rodents and insects can trigger an arc flash. Eaton offers a comprehensive range of solutions to help ...

Our arc-resistant switchgear is designed and tested to meet ANSI / IEEE C37.20.7 standards and represents years of research, design, and manufacturing refinements by Crown's expert team of ...
