Now, the fate of the program is in question, the Trump administration argues, because of a massive spending and tax bill Republicans passed last month.

Those are some of the options that solar energy nonprofits and states are weighing after the Trump administration moved last week to terminate the Biden-era \$7 billion Solar for All program.

Right now, U.S. manufacturers do not produce enough solar panels to meet the nation's demand, but industry investments and federal tax incentives have been making progress, though ...

Facing macroeconomic challenges and shifting state and federal policies, an industry once defined by double-digit growth in installations is now experiencing steep declines - and the ...

Just one solar project has been approved on federal lands since Trump took office in January, and none have been permitted since July when Interior Secretary Doug Burgum ordered ...

In late 2023 alone, more than 100 residential solar dealers and installers in the U.S. declared bankruptcy, according to Roth Capital Partners--six times the number in the previous three ...

Is now a bad time to buy solar panels? It might be a bit of a slow period for the solar industry, but that doesn't mean you should delay a solar installation on your own home.

Federal solar incentives, including the ITC, will end for residential systems in 2025, significantly impacting affordability. Homeowners may face higher upfront costs and longer payback ...
