---

These double-glass modules assembled with bifacial PERCIUM cells have capability of converting lights incident on their rear side into electricity on top of is being generated by the front side, making them ...

Our dual-glass structure constitutes a sandwich-like design with a strong resistance to shock and vibration that ensures module safety during production, transport, and installation and ...

There are frameless, dual-glass modules that expose the backside of cells but are not bifacial. True bifacial modules have contacts/busbars on both the front and back sides of their cells.

In summary, the primary difference between a bifacial module and a double glass bifacial module is the presence of glass on both sides in the latter, which provides improved ...

The high-performance module Q.PEAK DUO XL-G10 / BFG is the ideal solution for commercial and utility applications thanks to a combination of its innovative Q.ANTUM DUO-Z technology and cutting ...

Raytech as a manufacturer and supplier of high-quality double glass solar panel, solar module, and solar panel, provide you with high-quality products and solar module customization service.

The high-performance module Q.PEAK DUO ML-G12S/BFG is the ideal solution for commercial and utility applications thanks to a combination of its innovative Q.ANTUM DUO technology and cutting ...

The bifacial dual sided glass module (G2G) generates more electricity by converting direct, radiant and scattered solar energy on both the front and the back side of the module.
