Located in Queensland's Central Renewable Energy Zone (REZ), the project combines Elements Green's global development expertise with SMA's advanced grid-forming and solar inverter ...

Listed below are the five largest energy storage projects by capacity in Australia, according to GlobalData's power database. GlobalData uses proprietary data and analytics to ...

The technology proposed and scale of electricity storage is new to the South Australian renewable energy sector and comprises RayGen's proprietary PV Ultra and Thermal Hydro technologies. The ...

AGL, Australia's biggest coal generator, has snapped up a newly approved solar thermal project in South Australia, adding to its options for long duration storage and marking a landmark ...

Chasing its ambition of adding 12 GW of renewables and firming capacity by 2035, the Australian Gas Light Company (AGL) Energy has acquired the Yadnarie solar and long-duration ...

The Garoo solar-plus-storage project is being developed via a collaboration between Jinko Power and Sydney-headquartered developer Bright Path Renewables. The approved ...

PV Ultra will concentrate sunlight onto Australian-made, highly efficient solar modules, and heat will be captured and stored in water reservoirs for on-demand electricity dispatch via Organic Rankine Cycle ...

Discover five energy storage projects revolutionizing Australia's energy landscape. Learn about innovative technologies, impressive capacity.
