This study focuses on photovoltaic battery storage, heat accumulators in local and district heating networks, thermally activated building systems and innovative storage concepts.

Austria quadruples subsidies as demand for solar and battery energy storage systems soars, adding 218 MW PV and 200 MWh storage capacity.

Austria can achieve a fully decarbonized electricity system with strategic storage planning. This paper presents three scenarios (policy, renewables and electrification and efficiency) for ...

Managed by the Austrian Climate and Energy Fund and co-funded by the federal government and electricity companies, the program is designed to accelerate the adoption of rooftop ...

A new energy storage study from PV Austria, conducted with Austrian Power Grid (APG), TU Graz, and d-fine, reveals how critical battery energy storage is for Austria to meet its...

Austria plans to introduce a "Made in Europe" bonus for solar and electricity storage projects but to limit renewables funding in 2025 to the legally possible minimum, the energy ministry ...

Austria has seen rising demand for residential and commercial storage. In the first call of the year, around 5,200 applications covering 192 MW of PV and 124 MWh of storage were approved.

PVTIME - PV Austria has released a key study providing a systematic assessment of the storage capacity required by its power system to maintain progress in the energy transition.
