BloombergNEF finds 2025 lithium-ion battery pack prices dropped to \$108/kWh amid LFP shifts and overcapacity; China saw the steepest declines.

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

For the better part of a decade, the battery industry has taken for granted that when the prices of lithium and cobalt spike, pack prices inevitably follow. But 2025 has seemingly broken that ...

Lithium-ion battery pack prices fell 20% in 2024 to \$115/kWh. Discover what this means for EVs, battery energy storage systems, and commercial & industrial energy storage.

Overcapacity and intense competition contributed to 8% decline in average cost of lithium-ion battery packs, according to BloombergNEF.

Up-to-date lithium battery cost guide with a detailed USD/Wh table: wholesale pack averages, and retail examples (EcoFlow, BLUETTI, Jackery, UDPOWER). Learn what drives \$/Wh ...

Recent estimates show that the average global price of lithium-ion batteries will reach 112 U.S. dollars per kilowatt-hour in 2025. Battery pack prices are projected to drop below the...

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest decline among all lithium-ion battery use ...
