What makes a good solar generator?

Solar generators need to keep the power coming in and going out. The best solar generators can simultaneously charge all your intended devices via whatever plugs are necessary. Any portable power station worth your money will have a high output capacity so you can charge many devices, even if they require a lot of juice.

What is the best solar power generator for camping?

Say you need a solar power generator for a few days of camping, over the course of which you're hoping to power a few small devices, a string of lights, and maybe even a small electric cooler--the Anker Solix C800 Plus is the perfect little unit. About the size of a shoebox and just 24 pounds, it's as portable and compact as can be.

What is a solar generator & how does it work?

Solar generators are portable power stations that combine batteries with one or more solar panels to provide electricity almost anywhere you need it. But, not all solar generators are created equal. Some are meant for small jobs like charging your phone while you're camping, while others are meant for big jobs like partial home backup.

Which solar generator should I buy?

If you need a larger, potentially expandable solar generator that offers a good dose of portability, it can't be beat. The Anker Power Station 767 solar generator's high capacity and fast charging make this long-lasting battery a solid everyday driver.
