Building better power supplies for 5G base stations Authored by: Alessandro Pevere, and Francesco Di Domenico, both at Infineon Technologies Infineon Technologies - Technical Article 2022

The coverage area of a 5G base station depends on several factors, including the transmit power, antenna gain, frequency band used, and the surrounding environment.

The battery is used to provide emergency power after the base station power supply is unexpectedly interrupted. The price of ordinary lead-acid batteries is 1~2 yuan/Ah.

To understand how, consider the power amplifier (PA) and power supply unit (PSU) in the 5G New Radio (NR) gNodeB base station. In 2G, 3G and 4G, the PA and PSU were separate ...

These tools simplify the task of selecting the right power management solutions for these devices and, thereby, provide an optimal power solution for 5G base stations components.

Under the impact of these problems, 5g base station power supply with maintenance free, high reliability, diverse installation methods and high IP protection level is one of the best solutions to solve the ...
