-----

Build compliant battery management systems for utility-scale, aerospace, and industrial applications. ASIL D architectures, UL certification ready.

Battery Management System (BMS) is the brain of lithium-ion batteries. At CM Batteries, our CTO Wang has over 20 years of experience in battery management system design, specializing in BMS ...

Let Codibly support your BMS journey--from custom software engineering and interoperability to regulatory compliance. Contact us to discuss how we can help you optimize your energy storage ...

We offer both Custom BMS Solutions and Ready-to-Deploy Platforms to meet diverse customer needs. With real-time diagnostics, precise voltage and temperature regulation, and advanced fault ...

Our process for creating custom battery management systems begins by developing BMS modules and custom BMS boards that manage your project's voltage, current, temperature, and data ...

Learn to design custom Li-ion battery management systems with expert guidance on circuit design, component selection, safety features & implementation.

At Promwad, we design custom BMS hardware and embedded software for Li-ion, LiFePO4, and other chemistries, optimised for your application's performance, capacity, cost, and safety requirements.

Custom BMS development allows you to create tailored solutions that perfectly match your unique battery chemistry, voltage requirements, communication protocols, and operational ...
