hello for the concrete blinding dimensions under isolated footings, does it need to be same size of the footing or bigger. in our case we have a 30cm blinding since the hard rock is at ...

I have a question of all you experienced structural (foundation) and geotechnical engineers. For the project on which I am currently working, there are two grades of PCC (plain ...

Hi, We have a tank farm where aviation turbine fuel (ATF) or jet fuel is stored in the refinery. "Hammer blinds" are being used for positive isolation which will isolate the tanks from the ...

The flocculation occurs in the bed, however, your problem is the floc forming too soon, forming large floc and collecting on the media surface and blinding it. You want to be looking for a ...

Good day, the contractor is proposing to remove the blinding concrete under the slab on grade and replace it by a layer of tout venant of 200mm thickness. After compaction, he will place the ...

When the sun is shining, PV systems can generate electricity to directly power devices such as water pumps or supply electric power grids. PV systems can also charge a battery to provide ...

Hi, I'm curious why we have to put the blind concrete underneath the spread footing or ground slab? It is just for protect the debris from soil to mix with fresh concrete. Is it necessary to have ...

Below, you can find resources and information on the basics of solar radiation, photovoltaic and concentrating solar-thermal power technologies, electrical grid systems integration, and the non ...
