---

In April this year, Invinity Energy Systems secured a 1.5MWh order for its vanadium redox flow battery (VRFB) from STS Group, for an installation at solar-plus-storage project in central Hungary.

With the aim to address these challenges, we herein present the vanadium ion battery (VIB), an advanced energy storage technology tailored to meet the stringent demands of large-scale ...

Hungary switches on its largest battery energy storage system at Dunamenti gas power plant to support grid flexibility near Budapest.

The combined storage capacity of these units is now capable of powering the decorative and public lighting of Budapest for four continuous hours, illustrating the significant impact of battery ...

Four new grid-scale battery energy storage projects have been announced by California energy supplier Central Coast Community Energy (CCCE), including three long-duration flow battery projects.

The current storage capacity of all BESS units on site would be sufficient to supply the entire decorative and public lighting needs of Budapest for 4 hours. The supplier of the equipment is ...

Europe's largest vanadium redox flow battery has reached a breakthrough in renewable energy storage.

The energy storage system will be installed alongside a large-scale solar PV array in western Hungary as part of a solar-plus-storage project.
