Summary: Explore how Bulgarian enterprises are integrating photovoltaic power generation with advanced energy storage pumps to achieve energy independence. This article examines industry ...

BRUSSELS - By 2025, Bulgaria is projected to be the third-largest in the European Union for newly installed battery energy storage capacity, holding a 9 percent market share, following ...

As solar energy adoption surges across Plovdiv, homeowners increasingly seek reliable home energy storage devices to maximize renewable energy use. This guide explores the best options available ...

At the close of 2024, Bulgaria's solar PV capacity had already reached 3.91 GW--an annual increase of over 1 GW. These developments come on the heels of Bulgaria's first renewable ...

Bulgaria has already begun storing solar energy in batteries through private investments, marking a significant step forward in the country's energy landscape.

Over the past five years, Bulgaria has seen a 42% increase in solar panel installations, creating a parallel demand for home energy storage systems. With EU funding programs like Green Bulgaria ...

Bulgaria reached a critical milestone in its renewable energy transition in 2025, building 1,416 MW (1.4 GW) of new solar photovoltaic (PV) capacity -- its third consecutive year above 1 GW - bringing the ...

Bulgaria installed 1,416 MW of new solar capacity last year, extending its run of annual additions above 1 GW to a third straight year and raising total installed solar capacity to 5,984 MW, ...
