What are used solar panels?

These are photovoltaic panels traditionally utilized to release electrons that power homes and offices. The term 'used' indicates that these panels have previously been installed and operated and are now up for resale. Purchasing used solar panels is a cost-effective entry into the world of renewable, clean energy.

Are used solar panels worth it?

Per the Department of Energy, panels must be "new or being used for the first time" to qualify for the 30% federal solar tax credit, so used panels won't do you any favors come tax time. While buying used panels represents a major immediate savings compared to buying new, the short-term value may not be worth it, in our opinion.

How much do used solar panels cost?

Take extra care of used solar panels so they last long on your rooftop. Refurbished: Refurbished solar panels cost 50%-70% less than new solar panels. They cost more than used solar panels because the products have been restored to an acceptable condition or standard. Used: Expect to pay between \$0.10 to \$0.60 per watt for second-hand solar panels.

Where to buy used solar panels?

Classified ad platforms, such as Craigslist or Gumtree, are great places to find holistic sellers in their local area, selling used panels at bargain prices. Another route in finding where to buy used solar panels is reaching out to local solar installers and companies.

Shop high-quality used solar panels at SanTan Solar. Save on renewable energy with budget-friendly options for residential home and commercial solar projects.
