-----

With transmission lines at overcapacity and permitting delays slowing the development of new grid infrastructure, battery energy storage systems (BESS) have surged as a profitable ...

Chile's rapid storage deployment carries implications far beyond South American markets. The country is effectively serving as a real-world testing ground for large-scale renewable ...

The project is located in Maria Elena municipality, in the Antofagasta region in Chile. It is expected to be one of the country's largest solar and storage projects once fully operational.

With transmission lines at overcapacity and permitting ...

In March 2024, Atlas Renewable Energy announced it has signed a power purchase agreement (PPA) with Chilean mining giant Codelco for the supply of 375 GWh of energy per year, to ...

Chile will need new renewable energy storage systems to replace its current backup capacity of coal-fired plants and natural gas-powered combined cycle turbines and improve the ...

From ESS News Solar and energy storage deployment is booming in Chile, spurred on by supportive government policy that has been markedly stable for 15 years.

Chile's electrification trajectory is robust: EV sales are accelerating, and power infrastructure capacity has surged. Yet, key challenges persist--chiefly, the uneven geographic distribution of charging ...
