Blackridge Research's China Solar Power Market Outlook report consolidate the developments and build a perspective on growth from the point of view of the solar sector, in its current and future role.

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

Since 2021, the solar photovoltaic (PV) modules market has experienced explosive growth, driven predominantly by the aggressive expansion of Chinese manufacturers, who maintain ...

China is leading this surge by a wide margin. In the first half of 2025, the country installed more than twice as much solar capacity as the rest of the world combined, accounting for 67% of...

Chinese solar exports at an all-time high despite drop in revenue. China's 2023 solar exports hit a record high with over 40% growth for all equipment. The surge was dominated by ...

As capacity is rationalized, leaders with stronger technology, balance sheets and differentiated offerings are best placed to exit the downturn early and pull the solar sector into a new ...

China's solar energy production is reaching simply staggering levels, dragging energy costs down around the globe.

China has been the largest solar PV market far and away for several years now (I'll come back to that later in a minute), but it's stunning to see that the solar market there is now more...
