Step 9: Know When to Call A Professional.  
Before cleaning solar panels, homeowners will want to make sure they have the right tools and equipment and feel comfortable handling the task. Next, homeowners will need to power the solar panels off before removing any loose debris or dust with a soft brush. The next step is for the homeowner to spray down the panels with a hose and scrub any problem areas gently with a soft brush and water, or a special cleaning solution for heavily soiled areas. Homeowners will then want to dry the panels with a soft cloth or squeegee before restarting the system. See more
