How do I design a rack for a data centre or server room?

Streamline your rack design with Dataracks and get the perfect solution for your data centre or server room. It's so straightforward, you can complete it in just four simple steps. Step 1: Fill out your rack requirements, including height, depth, width, and other specifications.

How do I design a racking system?

Design your racking system in a few quick and easy steps. Choose a cabinet size (H x W x D), and the image adjusts to your specifications. Continue by adding available accessories. Specify exact RU locations for your rack accessories for maximum design flexibility. Add notes to the data or server rack configuration as required.

How do I get a custom rack design?

Step 1: Fill out your rack requirements, including height, depth, width, and other specifications. Step 2: If you have a custom design, complete the custom form with your specific details. Step 3: Click "Get Quote" to review your design and ensure everything is correct. Step 4: Double-check your email details, and once confirmed, send it to us.

Can you customize a server rack builder?

Despite having the ability to customize with a rack builder, it's crucial to understand the unique dynamics of each data center. Our server rack configurator offers an extensive selection of accessories to meet diverse needs. From installing cool systems to inputting cable management solutions, each component is easily applicable to a design.

Our web-based rack configurator makes planning your ideal rack simple, fast, and accurate with no cost, nothing to learn, and no software to run. Design your racking system in a few quick and easy steps.
