The Dafan Solar Power Plant in China's Hubei province isn't just generating clean energy--it's rewriting the rulebook for sustainable infrastructure. Operational since 2022, this 850-megawatt behemoth ...

Explore the 5 Largest solar power plants from around the world. From systems in China, India and the United States.

The generation of solar power reduces the carbon footprint of the Hub, but, beyond that, also points to the potential that solar power holds for the future of South Sudan.

To access additional data, including an interactive map of global solar farms, a downloadable dataset, and summary data, please visit the Global Solar Power Tracker on the Global Energy Monitor website.

Electricity generation from solar and wind, measured in terawatt-hours.

Data and information about power plants and their location across the globe. All plotted on an Interactive world map.

In the first quarter of this year, China Datang Corporation Ltd. (China Datang) recorded a 10.88 percent year-on-year increase in clean energy generation, with wind power generation rising ...

Hubei Tongshan Dafan Fishery solar farm is an operating solar photovoltaic (PV) farm in Dafan Town, Tongshan, Xianning, Hubei, China.
