The project supplies power to California utilities, the city of San Jose, the Clean Power Alliance, and several corporations. This corner of the desert is ...

The Mojave Desert is one of the most promising areas in the world for developing solar energy. We're working to ensure this development is done in a way that protects the desert's unique landscapes ...

The project supplies power to California utilities, the city of San Jose, the Clean Power Alliance, and several corporations. This corner of the desert is a hotbed not only for solar but also for ...

Explore the Ivanpah Solar Electric Generating System with aerial photographs. Discover insights into its impact on the renewable energy field and future plans for the facility.

The Ivanpah Solar Electric Generating System is a 386-megawatt project consisting of three solar concentrating thermal power plants located in the Mojave Desert in San Bernardino County. The ...

China's solar farms in the Gobi Desert are transforming barren landscapes into productive pastures through solar grazing, creating a mutually beneficial system for renewable energy ...

Summary: This presentation describes research on soil and plant communities impacted by utility-scale solar energy (USSE) development in the Desert Southwest, USA.

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.
