A split-screen image shows the incredible progress made between 2017 and 2024, including a giant image of a galloping horse--an homage to Mongolia's culture and past--that holds ...

In Ordos, China, a vast solar power station is transforming the once barren Kubuqi Desert into a thriving ecosystem. With 196,000 solar panels forming the silhouette of a horse, the ...

The power station located in Dalad Banner, an administrative region in Inner Mongolia, boasts 196,000 solar panels that were installed in the pattern of a galloping horse.

This picture taken on August 10, 2025 shows solar panels at the Dalat Banner Photovoltaic Station, also known as the Junma or "Fine Horse", Solar Power Station, in the Kubuqi ...

The Junma Solar Power Station, completed in 2019, is arguably the most striking feature of this project. Designed in the shape of a galloping horse, it earned a Guinness World Record for the ...

The Junma solar power station -- "Junma" meaning "fine horse" in Chinese -- is part of an ambitious desert reclamation project known as the "great photovoltaic wall," stretching along the ...

Read the latest version. The Junma Solar Power Station, shaped like a horse and located in the Kubuqi Desert, is a key component of China's ambitious "Solar Great Wall" initiative. This ...

It won the China Energy Project Innovation Award in 2018, set a Guinness World Record with the largest solar panel image in the shape of a horse in 2019, and won the National Quality Engineering Award ...
