---

The main objective of the Global Solar Atlas is to provide quick and easy access to solar resource potential and photovoltaic energy data globally, with a click of a mouse. The GIS layers and poster ...

The Global Solar Atlas provide relevant information of solar power potential for energy generation. It is a project administered by the World Bank Group as part of the Energy Sector ...

It includes corresponding PV facility information, including panel type, site type, and initial year of operation.

Accurate mapping of photovoltaic (PV) power plants is critical for monitoring the development of solar energy generation and supporting PV operational management, policy-making, ...

Solar Resource Maps and Data Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Solar Supply ...

The Global Solar Atlas provides a summary of solar power potential and solar resources globally.

The World Bank and the International Finance Corporation, collectively The World Bank Group, have provided this Global Solar Atlas in addition to a series of global, regional and country GIS data layers ...

The largest collection of free solar radiation maps. Download maps of GHI, DNI, and PV output power potential for various countries, continents and regions.
