---

Unlike the usual monocrystalline or polycrystalline rooftop panels, these solar flowers are special because they are self-sustaining, all-in-one solar panel systems.

SmartFlower puts it on display. The system opens like a giant metal sunflower each morning, follows the sun all day, and folds itself to rest at night. It is more than a pretty sight. The ...

While traditional solar panels sit quietly on your roof, the SmartFlower makes a statement in your yard with its ground-mounted design and flower-like appearance. The most significant ...

Much like a real flower, the system unfolds its petal panels when the sun rises. The Smartflower then directs its petals toward the sun at a 90-degree angle and almost immediately begins to produce ...

Not all solar panels are capable of tracking and following the Sun. Thankfully, Smartflower comes with the technology already built to track and follow the Sun with their proprietary ...

Every morning at sunrise, SmartFlower automatically unfolds. The dual-axis system allows SmartFlower's solar panels to follow the sun across the sky throughout the day, always maintaining ...

While both the solar flower, also known as Smartflower, and traditional solar panels aim to generate clean electricity from the sun, they differ significantly in design, functionality, installation, ...

A complete review of Smartflower solar (solar flower) modules and whether they are worthwhile investment for homeowners.
