Bamako injecte une nouvelle enveloppe de 6,2 milliards de F CFA pour améliorer la fourniture d'électricité dans le pays.

It will enable the distribution of more stable and less expensive electricity to households and businesses, thus addressing a top priority for the government. The ratification by the Council of ...

Large parts of Bamako now receive fewer than six hours of power per day, straining hospitals, businesses, and households. Schools and universities were closed for about two weeks by ...

Losses on Bamako's main transmission grid are expected to decline from a projected level of 8.5 percent in 2024 (before the proposed grid reinforcements) to 4.5% by 2028, once these ...

In many areas throughout the country, supply disruptions have caused long lines for fuel, impacted the availability of electricity, and have the potential to disrupt the overall security situation in ...

The move follows a heightened risk alert issued by the U.S. Embassy in Bamako on October 23, warning that persistent fuel shortages were disrupting transportation, electricity, and basic...

Safety is often absent from the discussion on access to electricity. Faulty wiring can cause direct harm or indirect injury due to fires or explosions. To adequately mitigate safety risks, electricians must be well ...

The African Development Bank Group's contribution will help safeguard the power supply in Bamako, the capital of Mali, and ensure access to reliable, sustainable and modern energy services.
