By the end of June 2024, the mix of renewables - including small-scale solar - was providing 26.0% of US electrical generation, including 11.7% from wind, 6.9% from solar and 6.0% ...

A majority of all new generation capacity under development is for solar energy (55%), followed by wind (26%) and natural gas (11%). However, over two-thirds of the wind capacity is in the proposed stage, ...

Renewable Energy Generation Renewables in The Electricity mix Hydropower Wind Energy Solar Energy Biofuels Geothermal How much of our electricity comes from renewables? In the sections above we looked at the role of renewables in the total energy mix. This includes not only electricity but also transport and heating. Electricity forms only one component of energy consumption. Since transport and heating tend to be harder to decarbonize - they are more reliant on oil and gas - r... See more on our worldindata Enerdata Wind & Solar Share in Electricity Production Data | Enerdata Weight of solar and wind in electricity production data. Data for solar and wind renewable energies in electricity production available in a map and excel file by country level.

Led by Iowa, South Dakota, Kansas, and New Mexico, 30 states generated at least 10% of their in-state electricity from solar and wind combined in 2024. California, Texas, and Florida ...

Global renewable electricity generation shares by technology, 2015-2030 - Chart and data by the International Energy Agency.

In this interactive chart, we see the share of primary energy consumption that came from renewable technologies - the combination of hydropower, solar, wind, geothermal, wave, tidal, and modern ...

Wind and solar electricity output account for a large and growing portion of power generation, with jobs in those sectors making up an increasing share of energy employment. This ...

It is published annually as a March special issue of the China Energy Policy Newsletter. The Summary summarises the annual statistics of China's energy and power supply and consumption in the ...
