Convert to British Thermal Units, calories, joules, therms, and electron volts. Learn how to convert among energy units.

In physics, we often discuss different quantities like energy, time, and work. Each of these quantities needs a standard unit of measurement to help us describe and understand them properly.

Convert between calories, joules, kilocalories, kilowatt-hours and other metric and imperial energy units using this energy conversion tool

Our online conversion calculators, formulas, and examples provide a quick and easy way to perform Energy conversions between the International System of Units.

Free energy unit converter, online, provides quick conversions between more than a dozen energy units, including joules, calories, kilojoules, kilocalories and other energy conversions.

Free online energy converter - converts between 55 units of energy, including joule [J], kilojoule [kJ], kilowatt-hour [kW*h], watt-hour [W*h], etc. Also, explore many other unit converters or learn more ...

Energy Converter - Convert between various energy units like joules, kilojoules, kilowatt-hours, calories, and more. Accurate and easy-to-use tool for quick energy conversions.
