How will Estonia support offshore wind energy?

Estonia plans to launch a 20-year support scheme for offshore wind energy and has launched an auction for state-owned lands with the potential for developing onshore wind farms. State aid for offshore wind farms

Are Estonia's offshore wind farms being scrapped?

However, developers who spoke with ERR said none of their projects have been scrapped. The state's decision to abandon an auction scheme for offshore wind farms could dampen foreign investor interest in Estonia's renewable energy sector and slow the rollout of projects. Developers, however, say none of their projects have been scrapped.

Why is electricity consumption so high in Estonia and Latvia?

Today, the electricity consumption in Estonia and Latvia exceeds the production volumes and consumption peaks are covered by imported electricity. Many high-volume electricity power plants run on nonefficient and outdated technologies.
