There's a great video produced by HCI () that provides a succinct overview of how the container folds down quickly and safely and can create extra room on ...

SeaFold containers assist space allocation at container terminals, railheads, and ports, and minimize container slots needed on ships, barges, trucks, and rail, by 80%.

Folding and unfolding of such containers take only ten minutes and four folded containers are connected or "bundled" together to form a single unit. These bundled single units are then ...

Discover how horizontal expandable containers cut empty return costs by 60% and boost port efficiency. See real ROI, sustainability gains, and space savings. Learn more now.

When collapsed, a bundle of five SeaFold containers accommodates the same slot as one standard 40" HC container. Folding and storing the SeaFold container is quick and safe, with ...

We design foldable intermodal shipping containers that exceed ISO and CSC standards, and the systems needed to fold them standing upright in bundles, safely and quickly.

A five-in-one foldable container design could boost efficiency and transform the carriages of empties, claims Florida-based Compact Container Systems (CCS).

At container terminals, SeaFold containers serve as a strategic solution for alleviating both current and anticipated port congestion. Their compact nature when collapsed liberates valuable storage space ...
