Over the 12 months to June 2025, imports of solar photovoltaic (PV) panels into Africa reached record levels, driven overwhelmingly by Chinese exports.

South Africa continued to be the largest solar importer in the 12 months to June 2025. Nigeria has become the second-largest importer of solar panels, with 1,721MW brought in over the ...

We exported crude oil and imported refined petrol. Now we export lithium, cobalt, and manganese, and import finished batteries, panels, and turbines. The language has changed, but the ...

Discover how African nations like South Africa, Morocco, and Egypt are leading in solar exports, driving renewable energy growth globally.

In the 12 months leading up to June 2025, Africa Solar Imports reached unprecedented levels, primarily driven by Chinese photovoltaic (PV) panels. Total imports soared to around 15 ...

Recent data suggests the beginning of a similar trend in select African markets. Ember reports that Chinese solar panel imports to Africa grew by 60% in just one year. Satellite data and ...

Twenty countries set new records for solar panel imports in the 12 months to June 2025, says the report - all those had imports of at least 30MW; a further seven countries also set a record, ...

According to a new analysis of China's solar panel exports data from energy think tank Ember, solar panel imports into the continent jumped 60% in the 12 months through June 2025, ...
