Our lithium-ion cabinets with 90-minute fire protection offer the safest option for storing modern energy storage systems. The charging cabinets are equipped with shelves and a plug-in design for ...

A gas generator is used to generate pressure gas inside the device, and the device is filled with liquid, cooling and environmentally friendly fire inhibitors. The device can be installed in a normal ...

We focus exclusively on R& D, manufacturing, and sales of industrial and commercial energy storage solutions, adhering to the highest industry safety and quality standards.

The Smart Energy Storage Integrated Cabinet is an integrated energy storage solution widely used in power systems, industrial, and commercial applications. This cabinet integrates advanced battery ...

Energy storage is a key component in balancing out supply and demand fluctuations. Today, lithium-ion battery energy storage systems (BESS) have proven to be the most effective type and, as a result, ...

To address this, the industry has developed a multi-level fire protection solution that includes PACK-level, Cluster-level, and Cabinet-level fire suppression mechanisms.

Within the IP54 protected cabinet consists of built-in energy storage batteries, PCS inverter, BMS, air-conditioning units, and double layer fire protection system.

Utilizing total flooding technology, FirePro systems quickly cool and smother fires, reducing the possibility re-ignition and thermal runaway propagation. Tested and proven, they ensure rapid, ...
