Nonprofit entities, including nonprofit independent schools, are now eligible to receive payment in lieu of tax credits for energy projects like solar photovoltaic (PV) systems.

By lowering energy costs and increasing the supply of clean electricity to the grid, solar has transformed how schools nationwide consume energy. Through the Clean Electricity Investment ...

These credits provide reimbursements for completed school-based projects, including solar energy, energy storage, ground-source heat pumps, electric school buses, and electric vehicle ...

The ability for school entities to receive elective payments associated with Federal Investment Tax Credit incentives makes solar energy system ownership for schools more attractive than ever.

Through Elective Pay, school districts can access federal energy tax credits to defray the cost of highly-efficient, modern energy technologies. These upgrades can help districts reduce operating costs and ...

Deploys solar + energy storage on all or most schools in the State. Reduces school operating costs, creating resources for teachers and students. Secures IRA tax credits to fund 30%, 50%, or more of ...

Historically, it wasn't possible for schools and other tax-exempt entities to take advantage of clean energy tax credits. Now, thanks to direct pay, these entities can receive the full value of the tax credit ...

While many schools rely on third-party funds to support solar projects, there are additional opportunities to scale renewable energy adoption through federal programs, state legislation, and ...
