Multiple Spans: Flexible brackets can be arranged in continuous multi-span configurations based on terrain conditions, without the need for breaks in the middle. The array ...

Flexible photovoltaic supports break through the limitations of terrain and can be widely used in large-span complex terrain and "PV+" scenarios.

The utility model provides a flexible photovoltaic bracket, which is used to solve the technical problem that the existing connection nodes usually adopt two clips, and the cable rod is...

Since traditional ground-based rigid photovoltaic supports have certain site restrictions, a large-span flexible photovoltaic support structure composed of a prestressed cable system has been ...

From pre-sales consultation to post-sales maintenance, we provide thorough support for you. We work closely, deeply understand your needs, and tailor solutions accordingly.

Jinko Solar increased bracket sales by 40% after implementing live chat with engineering support. Turns out installers love real-time wind load calculations!

Downstream activities are focused on the distribution and installation of PV brackets in solar projects. This includes the sales and logistics operations that ensure the timely delivery of the bracket systems ...

A DAS Solar flexible bracket counteracts high structural loads by applying pre-tension to a steel cable, allowing it to span between 20m and 40m by controlling cable strength and deformation.
