---

A 128-megawatt battery facility will be colocated with an existing solar facility adjacent to Robins Air Force Base in Bibb County, Georgia. It will utilize the existing infrastructure, thereby ...

The Robins project in Bibb County (128 MW) and the Moody project in Lowndes County (49.5 MW) are co-located with solar facilities near military bases, cutting out the need for new ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal operating ...

Georgia Power is investing in battery energy storage systems to meet the state's growing demand for energy. These systems are designed to store excess renewable energy when demand is ...

This pilot aims to secure an initial 50 MW of capacity, providing opportunities for residential and small commercial customers to add solar and storage resources. The goal is to ...

A 49.5-megawatt battery system at Moody Air Force Base, about 12 miles north of Valdosta. The batteries will be paired with a solar installation at the base.

The Mossy Branch BESS can store excess renewable energy (e.g., solar power) during low-demand periods and release it during high-demand times, enhancing the grid's efficiency and ...

The EPC is Crowder. It will utilize lithium iron phosphate Tesla Megapack 2 XL batteries, which will be paired with an existing solar project at the base. It's expected to be online in 2026.
