As renewable energy adoption grows in Guinea-Bissau, variable speed energy storage systems are becoming essential for stabilizing power grids and optimizing energy use.

Equatorial Guinea's energy sector is undergoing a green transformation, with growing demand for reliable storage solutions to support renewable energy projects.

We offers containerized generator sets with CHP and Emission control system. With our genset containers offer optimal performance in various site conditions.

As the core power guarantee for the project, Comler's diesel generator sets are tasked with supporting critical operational scenarios, including container crane systems, terminal lighting, ...

Simply put, dual packs are two parallel generators in one ISO container: Two 500 kW generators could be paralleled to achieve a 1000 kW output, or two 625 kW generators to achieve 1250 kW. This dual ...

The container is with CSC certification, in line with international container security convention, ensures shipping directly as a standard container, and greatly saves the cost of transportation.

Unlike traditional enclosures, our containerized generator enclosures offer enhanced mobility, allowing you to easily transport and relocate your generator equipment.

In Guinea, where unstable grid infrastructure and rapid industrialization collide, containerized generators have become a lifeline for businesses. These modular power solutions offer flexibility, scalability, and ...
