Jingneng Green Power Hydrogen Production Solar PV Project is a 200MW solar PV power project. It is planned in Hebei, China. According to GlobalData, who tracks and profiles over ...

Hengtong Group announced today, on January 7, 2025, that this development marks the launch of "China's first" PV project aimed at ecological remediation of tidal flats. The project ...

Quick Facts There are more than 8,400 major solar projects currently in the database, representing over 353 GWdc of capacity. There are over 1,400 major energy storage projects currently in the database, ...

The demonstration project, funded and constructed by Huaneng Gansu New Energy Company, is backed by an 8MW photovoltaic plant. It utilizes Huaneng's own 1300 Nm³/h high ...

"China's largest" integrated offshore photovoltaic (PV) demonstration project, combining solar power, hydrogen production and refueling, and energy storage, has been connected to the grid ...

China's Sinopec has switched on the world's largest solar-to-hydrogen project in Xinjiang, while India has unveiled a new plan to incentivize green hydrogen and electrolyzer production.

The green hydrogen plant is developed as a solar & wind integrated plant with 1.85 GW solar energy and 370 MW wind energy. It was built by a Chinese state-owned utility, Beijing Jingneng.

Once fully operational in 2025, the project is expected to generate an average of 468 million kilowatt-hours of electricity annually, equivalent to saving approximately 151,000 tonnes of ...
