What arc flash mitigation services does Swe offer?

Southwest Electric Company (SWE) offers arc flash mitigation services. They can perform any arc flash studies you need, partnering with an engineering firm to analyze the results. From there, they can provide solutions to reconfigure any equipment that exceeds safety limits.

What is arc-flash-protection equipment?

Arc-flash-protection equipment encloses or insulates against electrical hazards to reduce the risk of injuries to those working on or near electrical equipment. It helps prevent exposure to electric arcs, which can generate extreme heat and light. Arc-protection blankets enclose areas with potential electrical hazards.

How to protect workers from arc flash incidents?

Foot Protection: Leather boots or insulated shoes. These protective measures can effectively reduce the risk of injury in arc flash incidents and ensure workers' safety. We offer multiple optional or customized components. These configurations can be customized according to requirements to better meet security needs.

How dangerous is an arc flash?

An arc flash can be quite dangerous, potentially exceeding 40 cal/cm², according to current industry standards. The industry continues to learn better ways to reduce the risk of such incidents. Learn everything you need to know about arc flash on our blog.

Point Eight Power offers a full line of low- and medium-voltage arc-resistant switchgear to help combat the over 30,000 arc flash incidents that occur each year - causing thousands of injuries and fatalities.

Rapid arc flash detection and protection offer very fast and reliable interruption of an arc fault by tripping the upstream supply of energy to the faulted compartment.

Arc protection relays can detect arcs by monitoring parameters such as current, voltage, and electric power, and quickly disconnect the power supply before an electrical fire occurs, thereby reducing the ...
