Starting with a standard 12-inch container, for example, we recommend using 3-4 quart-sized plants: Growing in a larger container, like the one pictured, allows for more flexibility with plant sizes and ...

Discover what to look for in a flower locker, from design and durability to ventilation and price. Make an informed choice with this expert guide.

We use Procona"s from Pagter on shelves. I have industrial metal shelves, just two shelves both with two shelves if that makes sense. 3 gallon buckets for flowers. I put cases of greens up top ...

We can leave these containers outdoors year round (with below freezing temperatures) and they hold up for going on 5 years. The styles offered are more traditional and come in very large ...

Proven Winners &#174; perennials in trade gallon containers are anywhere from 1- to 2-year-old plants and approximately 4-8 inches tall - dependent on the plant variety. This is a great size, to get a head start ...

Always check plant tags, read seed packets, or do a little online research to find the full height and width of each type of plant you want to grow in a container so you can avoid overcrowding.

Flowers for the garden come in almost every color and shape imaginable - here are 25 great flowers for your garden.

A wide and tall locker, such as one with a width of 1200mm, a height of 2200mm, and a depth of 800mm, can hold a large inventory of different flower types. This ensures that customers have a wide ...
