Battery cabinets that are not supplied with an incorporated DC output disconnect device must have an appropriate disconnect device provided external to the cabinet.

Whether the Battery Cabinet is empty or partially assembled, it should be located, mounted and properly grounded prior to final assembly as instructed in this manual in sections 6.2.1, 6.2.2 and 6.2.3 ...

It covers every detail, including the installation of removable casters, heavy-duty bus bars, and other complex steps, ensuring clarity and ease of understanding.

Installation or replacement of batteries must be located in a SERVICE ACCESS AREA: The service manual shall include the following instructions for battery replacement and disposal:

Discover the importance of battery charging cabinets for safe lithium-ion battery storage. Learn about key features, benefits, and best practices for workplace safety.

This user manual contains guidelines to install the battery cabinet and it is intended for people who plan the installation, install, commission and use or service the battery cabinet.

To maximize battery capacity after adding new battery modules, allow the battery to charge to 100%. Leave the system set to Priority Backup or Clean Backup system mode for several days to allow the ...

Refer to "Securing the Batteries Using the Battery Retention Strap" on page 21 for instructions on securing the batteries using the buckle strap provided with the battery cabinet.
