Key sections of a research proposal include: the title, abstract, introduction, literature review, research design and methods, timeline, budget, outcomes and implications, references, and appendix. Each is briefly explained below. Watch my Guide: How to Write a Research Proposal

What is a project proposal?

A project proposal is a detailed project document that's used to convince the project sponsor that the project being proposed is worth the time, money and effort to deliver it. This is done by showing how the project will address a business problem or opportunity. It also outlines the work that will be done and how it will be done.

How do you build a project proposal?

When building a project proposal, it's vital to remember your target audience. Your audience includes those who are excited about the project, and see completion as a gain for their organization. Conversely, others in your audience will see the project as a pain and something to which they aren't looking forward.

Writing a research proposal is the first step for a research project. Before you can work on your research, it must be approved, whether that is by a professor, thesis advisor, or supervisor.
