How much does solar energy cost in Italy?

For many homeowners, this means energy bills that can exceed EUR200-300/month, especially if you use air conditioning or have electric heating systems. Fortunately, solar energy in Italy is an effective solution. With an average of 2,000+ hours of sunshine per year, most regions -- from Tuscany to Puglia -- offer excellent production potential.

Is Italy a good place to install solar panels?

Increasingly, international homeowners in Italy are opting to install solar panels. And for good reason. Italy offers some of the best conditions in Europe for solar energy: abundant sunshine, mild winters, and a growing culture of sustainability.

Which European solar companies are headquartered in Italy?

2. Futura (formerly Falck Renewables) This European photovoltaic leader, headquartered in Italy, has expanded significantly through strategic acquisitions and investments in next-generation solar technologies.

What is the solar industry in Italy?

The Italian solar industry encompasses everything from residential rooftop installations to utility-scale solar farms, with companies specializing in various segments of the value chain. Italy's solar capacity has grown exponentially in recent years, with over 35 GW installed as of 2025.
