The assembly will focus on expanding solar deployment, unlocking climate finance, shaping technology and policy roadmaps, and building skills to ensure a just and inclusive energy ...

# Excluding Nuclear Capacity of 100 MW, which is under outage for very long time, and have been removed temporarily w.e.f. 31.05.2025. For more details, Click below.

OverviewHistorySolar potentialInstallations by regionInstallations by applicationConcentrated solar powerHybrid solar plantsSolar heatingSolar power in India is an essential source of renewable energy and electricity generation in India. Since the mid-2010s, India has increased its solar power significantly with the help of various government initiatives and rapid awareness about the importance of renewable energy and sustainability in the society. In order to decrease carbon dioxide emissions, reduce reliance on fossil fuels, with coal being th...

So much so that India actually is the home to the biggest solar power plant in the world, yes, we are talking about Bhadla Solar Park. Just like that, today, we are about to take a good look at ...

With an impressive capacity of 126 MW, this project stands as one of India's largest floating solar installations, marking a significant milestone in the country's renewable energy journey. The EPC ...

The Gujarat Hybrid Renewable Energy Park, being built near Khavda in the Rann of Kutch desert in Gujarat, will generate 30 GW AC power from both solar panels and wind turbines. It will become the ...

India is spearheading a solar energy revolution, aiming for 500 GW of non-fossil fuel energy capacity by 2030. The country has rapidly expanded its solar sector, surpassing 100 GW in ...

Today, we spotlight India's top five solar power plants in 2025, ranked by capacity, highlighting why each holds the title of the largest solar power plant in India or biggest solar power ...
