The Edge Platform continuously collects extensive data from meters, breakers, energy storage and solar generation systems and conducts local, real-time control.

Backed by decades of experience in electricity markets, power system modelling, and energy policy, we combine deep technical knowledge with a strong commitment to integrity and transparency.

Intelligent Energy Storage Systems (IESS) are at the forefront of this shift, enabling smarter, more reliable power management.

Meet the silent guardian of modern power systems - Nicosia Energy Storage Power Integrity Service. In 2025, the global energy storage market hit \$89 billion [1], but here's the kicker: 68% of grid failures ...

In the scope of the IESS, the dual battery energy storage system (DBESS), hybrid energy storage system (HESS), and multi energy storage system (MESS) are specified.

Power shortage and failure can be avoided with the help of SESUS because it increases grid resilience by offering distributed energy storage that can quickly react to changes in renewable ...

Polarium offers comprehensive energy storage solutions from design and commissioning to market integration and operation. We empower our customers to participate in a flexible, ...

Huijue Group offers industrial and commercial energy storage, PV-BESS -EV Charging, Off-grid / On-grid Microgrid, telecom site solutions, and home solar energy storage, ensuring ...
