This project marks a major leap for Iran's renewable energy sector and a strong international investment and cooperation with China. The 200 MW solar plant not only boosts energy ...

The Iranian government has unveiled a sweeping energy transition initiative to decouple all state institutions from the national power grid, prioritizing off-grid photovoltaic (PV) systems to ...

Iran has opened the first phase of its largest solar power plant as part of a massive government program to expand renewables capacity in the country.

Iran has set a new national record in solar energy generation, achieving an unprecedented 800 MW of instantaneous output from solar power plants across 24 sites in several ...

Iran has set a new record in solar power generation, with output from its solar plants reaching 800 megawatts on August 26, according to the Renewable Energy and Energy Efficiency ...

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining 480 MW will be installed over the next 18 months in ...

The purpose of this study was to replace thermal power plants with solar and wind resources to fulfill Iran's obligations under the Paris Agreement on the power sector.

Discover Iran's plan to develop 15GW of new solar capacity by 2030. Learn about the \$8.3B project, increased local panel production, and its economic impact.
