Generated on: 2026-03-12 15:13:27

What is ISO 50001?

The system is modelled after the ISO 9001 Quality Management System and the ISO 14001 Environmental Management System (EMS) and the 2018 version has clauses modular with both. A significant feature in ISO 50001 is the requirement to "... improve the EnMS and the resulting energy performance" (clause 4.2.1 c).

 What is ISO 50001 energy management system?

ISO 50001 Energy management systems - Requirements with guidance for use, is an international standard created by the International Organization for Standardization (ISO). It supports organizations in all sectors to use energy more efficiently through the development of an energy Management System.

 What is the second edition of ISO 50001?

The second edition, ISO 50001:2018 was released in August 2018. The system is modelled after the ISO 9001 Quality Management System and the ISO 14001 Environmental Management System (EMS) and the 2018 version has clauses modular with both.

 Is ISO 50001 certification right for You?

ISO 50001 certification is right if you and your organization want to take control of the way you use energy and manage the related costs more effectively. It is particularly beneficial for organizations with significant energy expenditure.
